# Follow the GDPR requirements

- [MOOC de la CNIL](#)

# The user must have the option to accept or reject or set up the use of cookies

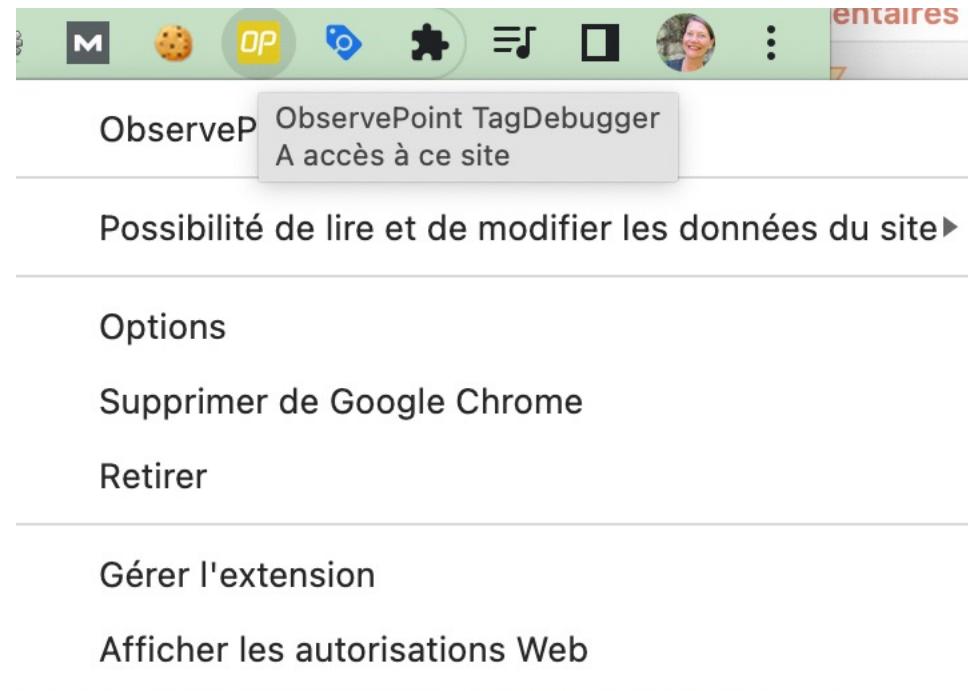

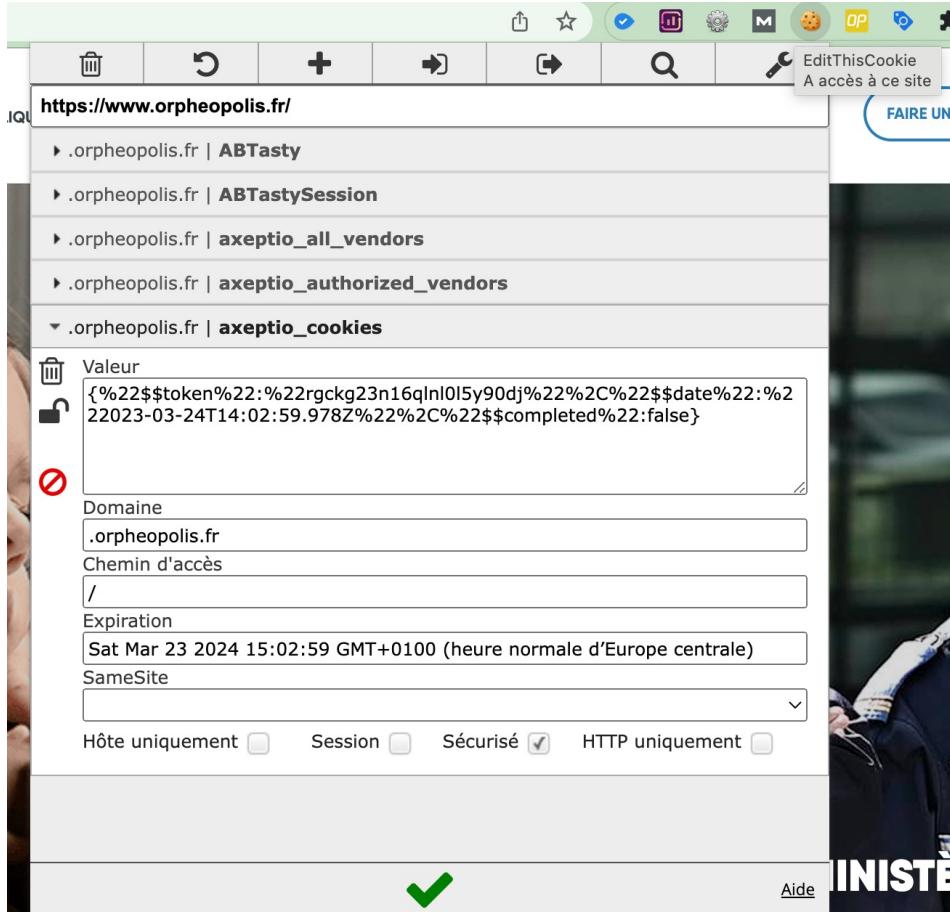

The screenshot shows the Orpheopolis website with a prominent yellow cookie consent banner in the foreground. The banner has a white background and black text. It reads "Gestion des cookies" at the top, followed by a paragraph explaining the use of cookies for site performance, advertising relevance, and data collection. It then states that clicking "Ok pour moi" allows all cookies, while "Continuer sans accepter" limits them to necessary ones. A "paramétrer" link is also present. At the bottom, there are three buttons: "Continuer sans accepter", "Paramétrer", and "OK pour moi". Below the banner, the main website content is visible, featuring a large image of a young girl and text about supporting police orphans.

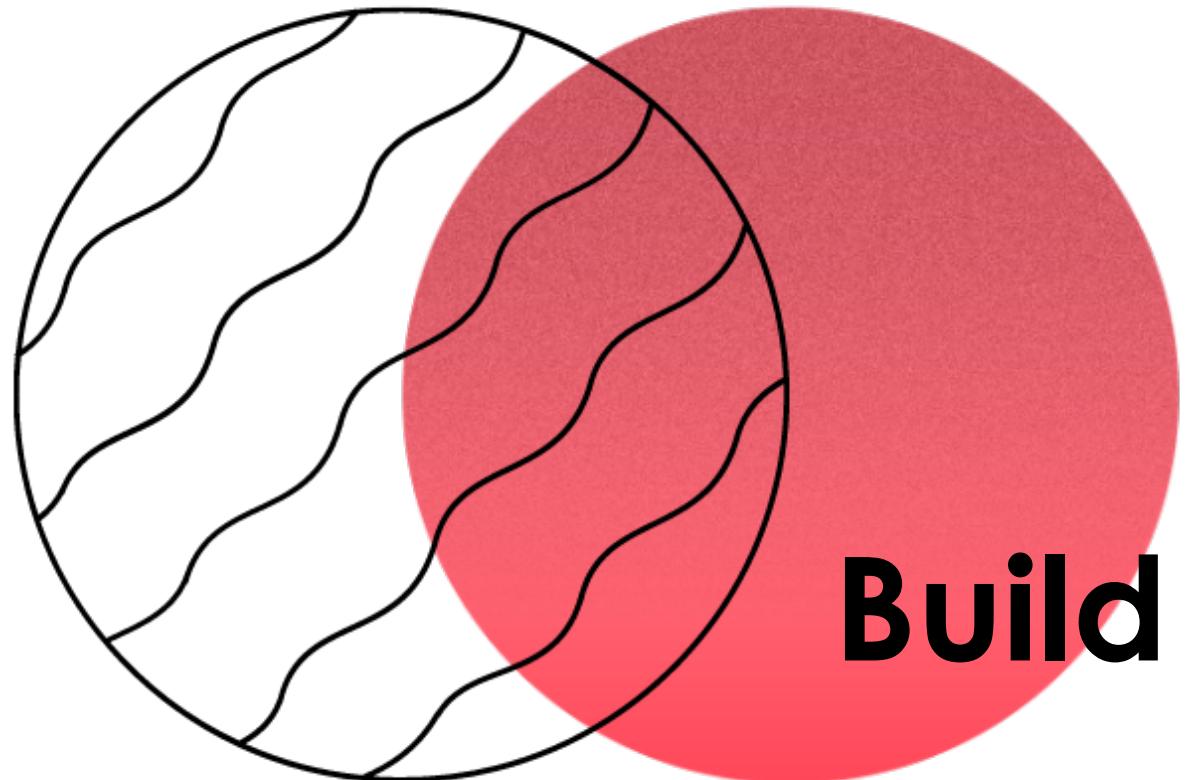

The screenshot shows the website for "POLICIERS ET AGENTS DU MINISTÈRE DE L'INTÉRIEUR". It features two police officers, one female and one male, both wearing uniforms with "POLICE" and "POLICE MUNICIPALE" caps. The text below them reads "VOTRE ESPACE DÉDIÉ". The overall design is professional and official.

Headley

# Why do you need SEO?

Be seen

Be known

Be found

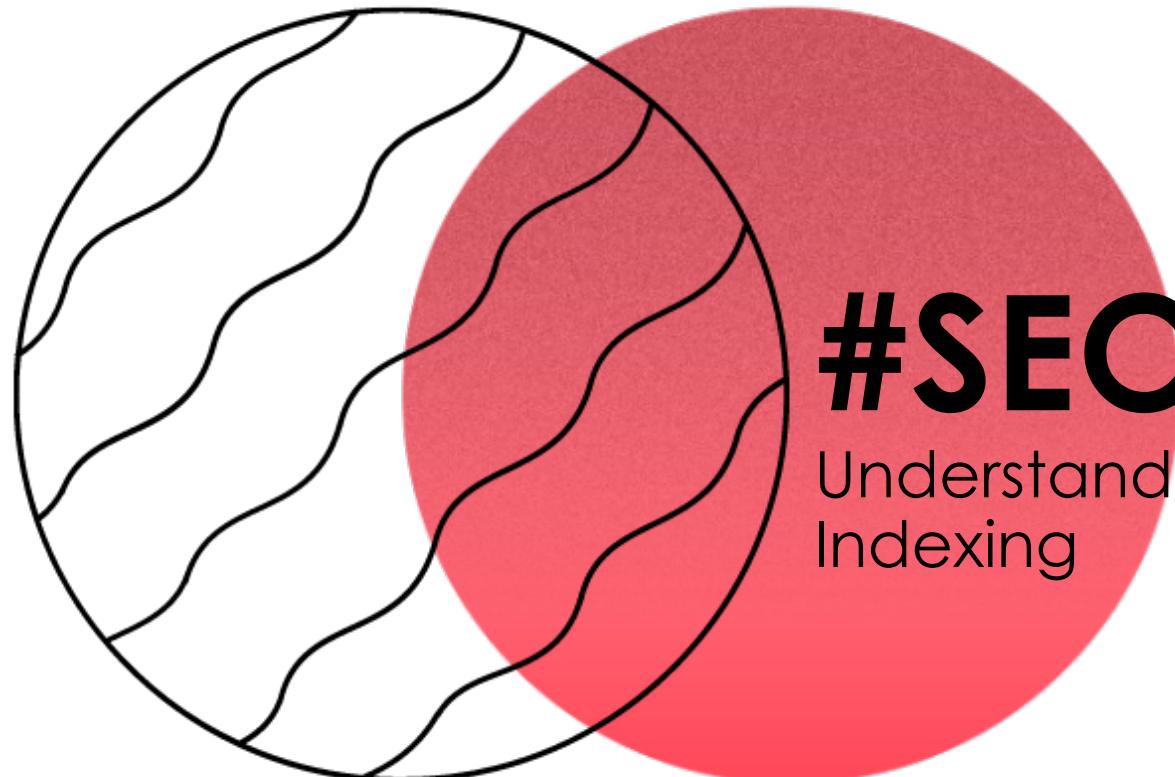

To prospect

To sell

# **SEO is based on 2 fundamentals**

- User experience
- Web accessibility

# #SEO1

Understand the concept of Crawling /  
Indexing

Headley  
and Co.

# Search engine robot activity

Search engine robots are constantly crawling the web

They go from page to page, follow links and record content.

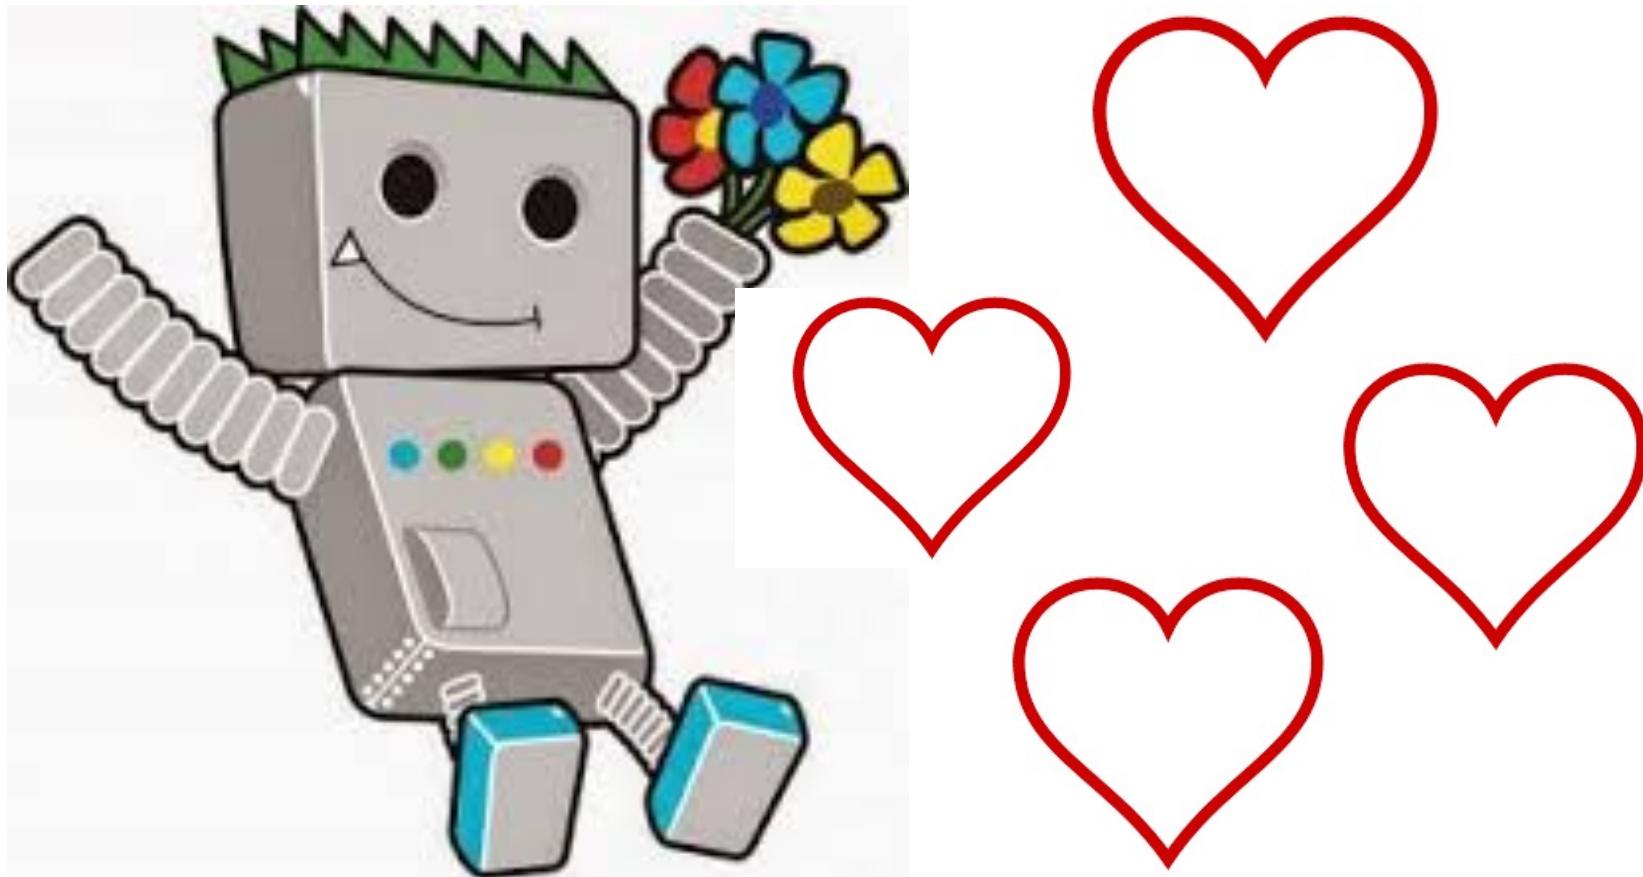

In the second step they classify contents according to different criteria

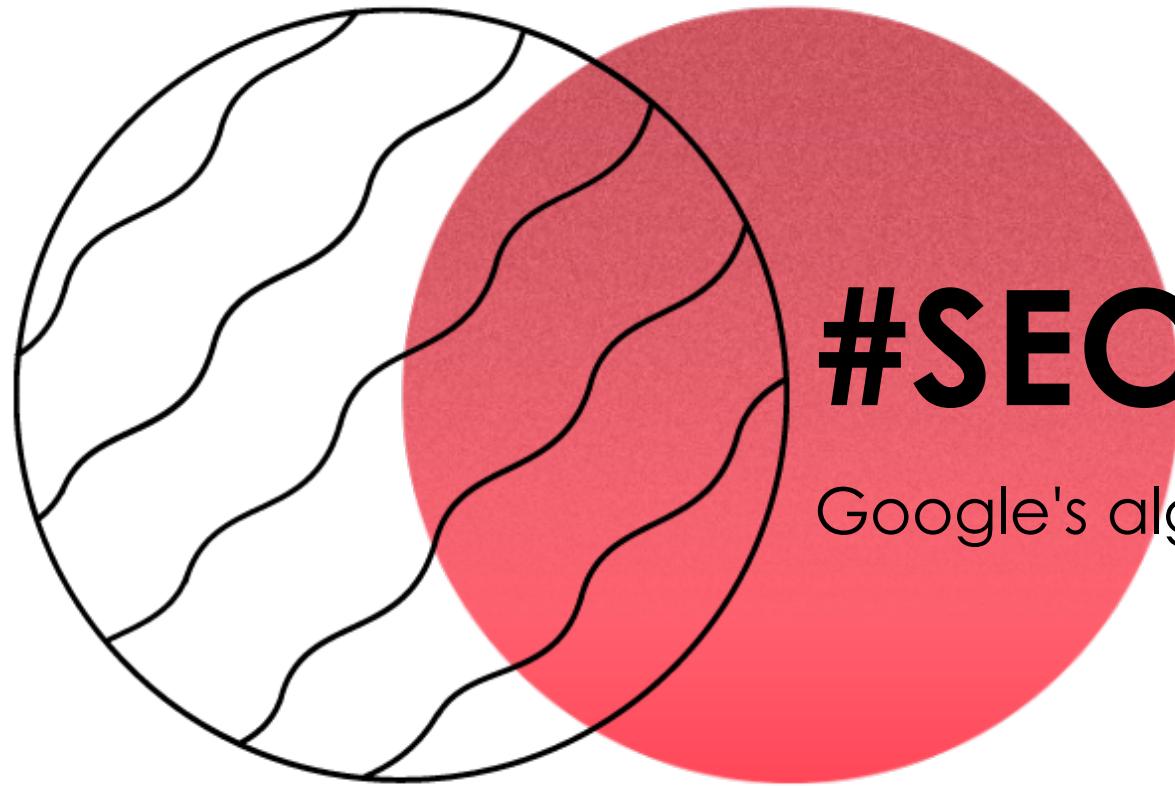

Provide website Ranking in SERP

# He must be crazy about you !

Headley  
and Co.

# #SEO2

Google's algorithm is changing regularly

Headley  
and Co.

# Major updates

27

1. Google Caffeine: A major update to Google's search algorithm launched in 2010, which improved the speed, accuracy, and comprehensiveness of Google's search results.
2. Google Panda: Introduced in 2011, the Panda algorithm is designed to detect and penalize low-quality or duplicate content on websites, while boosting the ranking of sites with high-quality, original content.
3. Google Penguin: Launched in 2012, the Penguin algorithm penalizes websites that use non-natural link-building tactics such as spammy links.
4. Google Hummingbird: Introduced in 2013, the Hummingbird algorithm improves Google's understanding of natural language search queries and provides more relevant search results for longer, more complex queries.
5. Google Mobile-Friendly Update: Launched in 2015, this algorithm gives a ranking boost to websites that are optimized for mobile devices in search results for users who are searching on smartphones and tablets.
6. Google RankBrain: Introduced in 2015, RankBrain is a machine learning system that helps Google better understand the meaning behind search queries and deliver more relevant search results.

# Major updates

1. Google Phantom: A series of unconfirmed updates to Google's algorithm that were first detected in 2013, which seemed to target low-quality or spammy content.
2. Google Mobile-First Index: An update to Google's search algorithm launched in 2018, which gives preference to mobile-optimized websites in search results for users who are searching on mobile devices.
3. Google Pigeon: Launched in 2014, the Pigeon algorithm is designed to improve local search results by providing more accurate and relevant results for local search queries.
4. Google BERT: Launched in 2019, the BERT algorithm uses machine learning to improve Google's understanding of natural language search queries and provide more accurate search results for complex search queries.
5. Google Core Web Vitals: It's a set of user-centric metrics introduced by Google in 2020 to help website owners and developers measure and improve the performance, speed, and user experience of their websites.
6. Google Product Review: Launched in 2021, this algorithm is designed to improve the ranking of product reviews that provide in-depth, unbiased, and useful information about products.
7. Emphasis on Useful Content: Google has always placed a strong emphasis on useful and high-quality content, and in recent years has implemented several updates to its algorithms to further prioritize content that is informative, well-written, and engaging for users.

# General steps to develop and implement an **SEO strategy**

#1 Identify pages to be optimized

#2 Define target audience and keyword research / Landing Page

#3 Analyse & Optimize

# #1 **SEO Landing pages**

It is not useful to optimize all the pages of a website  
but only the entry pages !

# What is an SEO Landing Page?

It is a web page that has been specifically designed and optimized to attract and convert visitors from search engines.

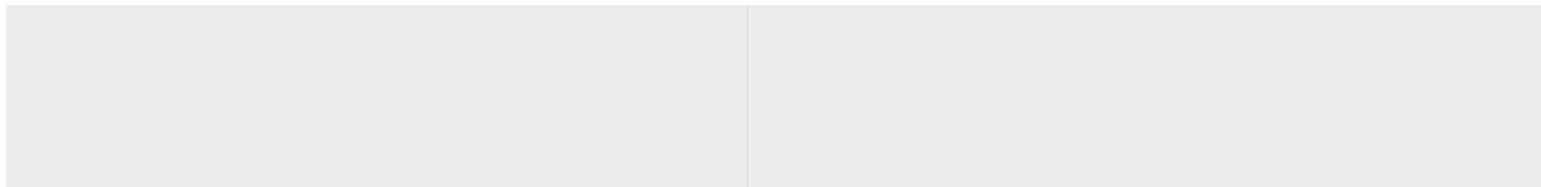

It is an entrance page : a web page that a user lands on when they first visit a website.

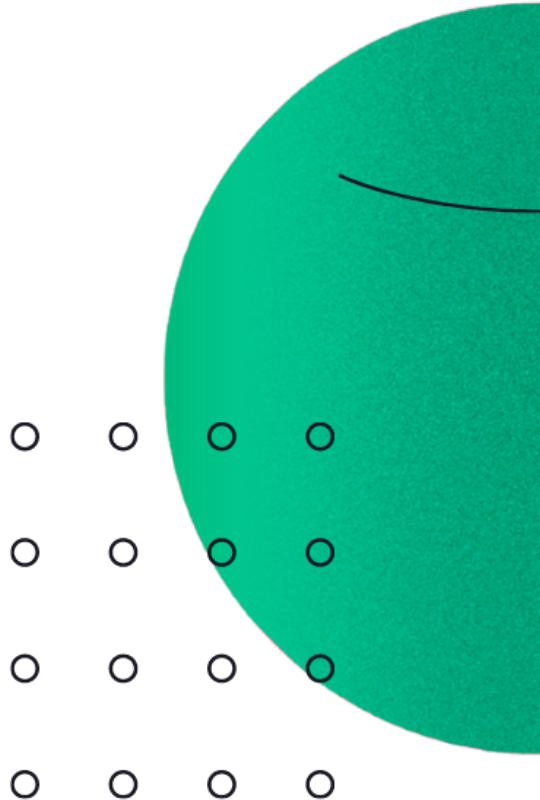

The main goal of an SEO landing page is to rank well in search engine results pages (SERPs) for specific keywords and phrases

# **Make a list of the urls of the landing pages of the site Monsieururl.com English version**

URL LANDING  
PAGE

MARKETING  
OBJECTIVE

## #2 conduct keyword research to identify the most relevant and valuable keywords to target.

Semantic Search

Wording

Use the right words!

Terms used by your audience

Search terms

# Select keyword queries per landing page

- Must match demand: High search volume in target area
- Must correspond to what the landing page offers. Be careful not to be too broad!
- Check the level of competition via the number of results in the SERPs.
- Have a good balance Volume / Competition
- High competition: LT
- Low competition: ST

# Tools

Google Ads

# 5-step process

1. Make a list of at least 20 keyword phrases

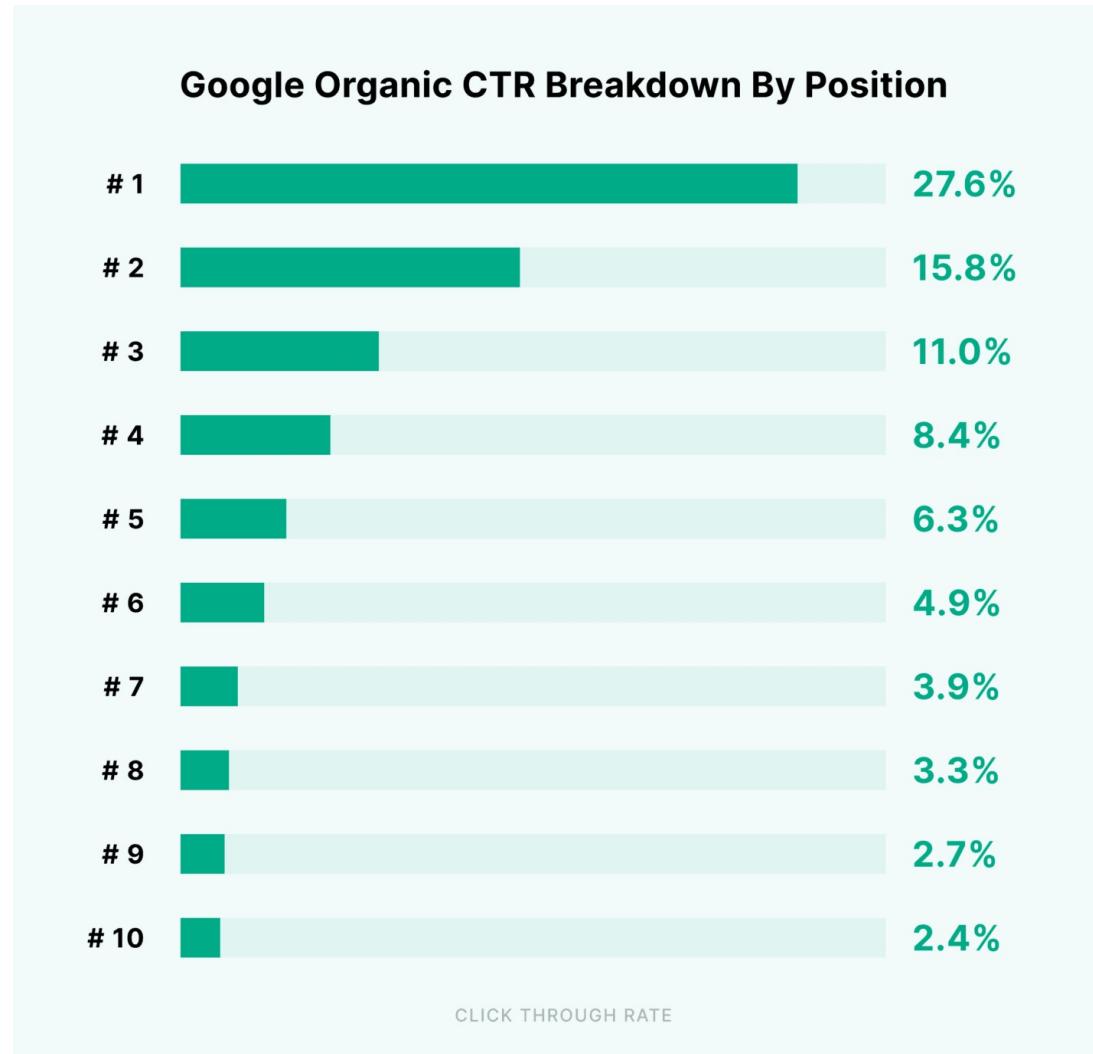

2. Identify search volume with SEMRUSH

3. select the term with the highest search volume

4 Identify web competitors

5. Select related keywords

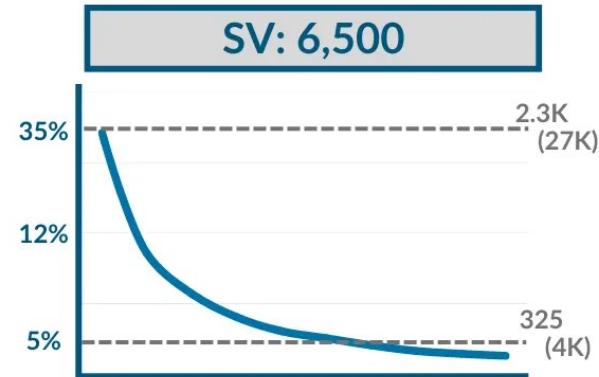

# Google Organic CTR

# Ranking opportunities

## Estimating Opportunity

- Setting up a business**
- X ① Government site
  - X ② Amazon
  - X ③ Google
  - X ④ How To Start a Business
  - X ⑤ Wikipedia
  - ⑥ Buy Business Setup
  - ⑦ 50% off Business Setup
  - ⑧ Us! 😊

**SV X CTR = CLICKS**

**6500 X 35% = 2.3K (27K)**

**27K - 4K = 23K**

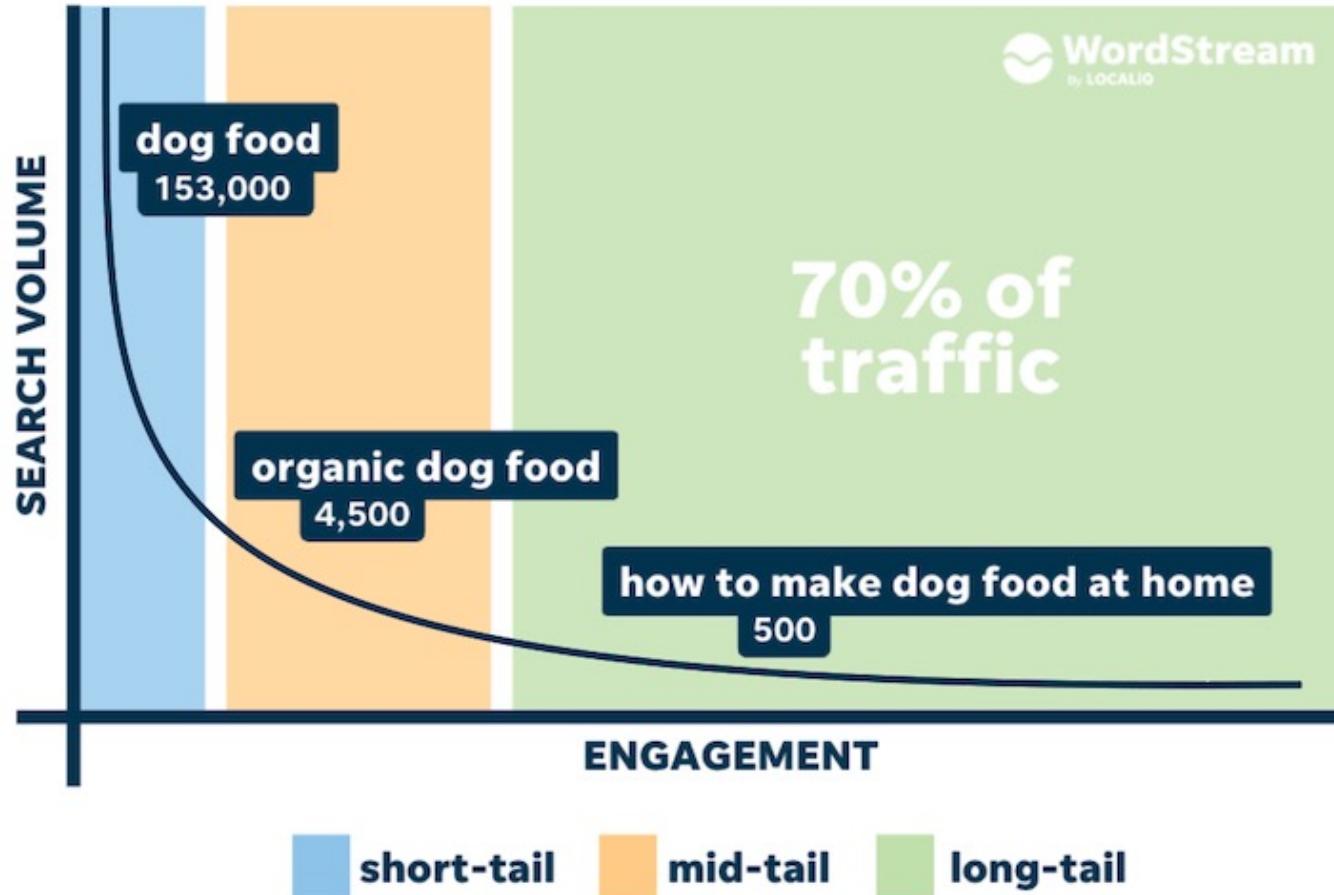

**aira | Robin Lord**

## SEMRush partnership

→ <https://www.semrush.com/signup/promo/?promo=CATHERINE2303-4CZEUTVL>

# Short Tail and Long Tail Keywords

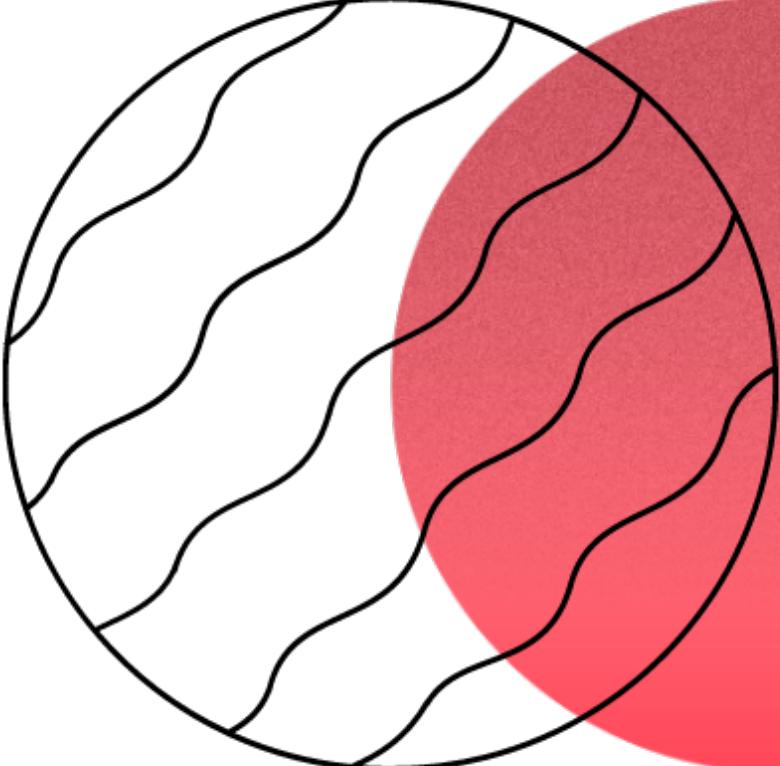

## LONG-TAIL KEYWORDS

# Present the results via a visual map

41

- XMind tool
- Must contain: positioning query short tail + long tail / Landing page

**Where to use the  
keywords on the  
website?**

# For the SERPs featured snippet

<https://www.electrodepot.fr> › aspirateur · Translate this page · :

## Aspirateur : Achetez pas cher - Electro Dépôt

🔍 2,132,767 📄 3,776 🔑 95

Un **aspirateur** est un appareil qui provoque une aspiration afin d'éliminer les débris des sols, des tissus d'ameublement, des draperies et d'autres surfaces.

★★★★★ Rating: 4.3 · 2,817 reviews · €0.01 to €368.78

Headley  
and Co.

# HTML markup

## → Title

- Max 65 characters
- Request at the beginning
- Domain name at the end
- Generate click
- No duplicates
- Fill in all of them

## → Meta Description

- Max 170 characters
- Use related keywords
- Generate clicks
- No duplication
- Fill in all of them

# Image naming & Alt attributes

- query-reproduct-brand.jpeg
- Use new image formats to improve page performance (WebP)

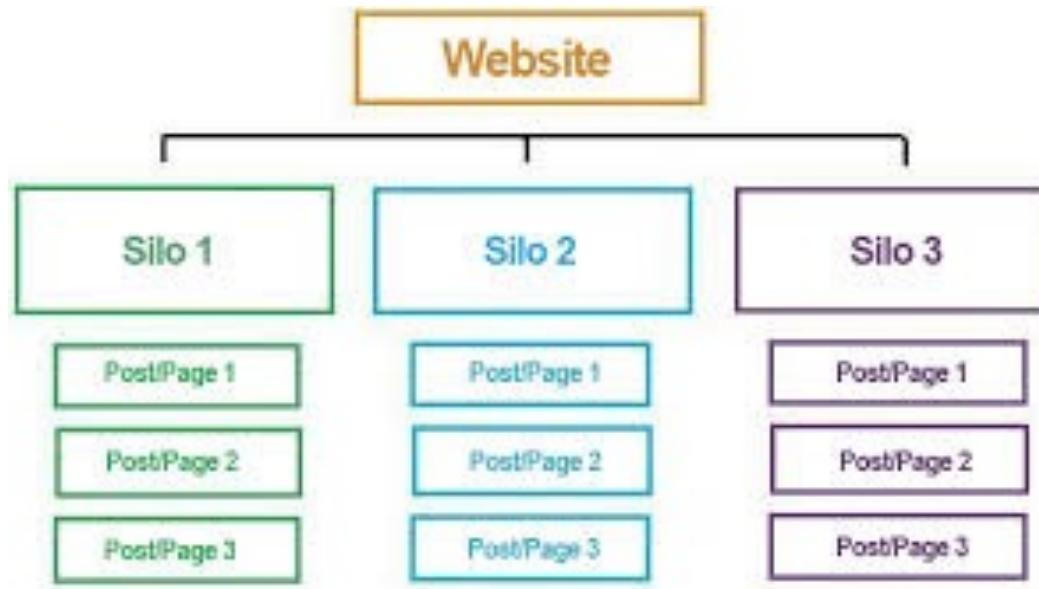

- Web accessibility - describe the image using the page query

# Schema – Structured data

## Tester vos données structurées

Nous vous recommandons de commencer par le [test des résultats enrichis](#) pour découvrir les résultats enrichis Google qui peuvent être générés pour votre page. Pour valider un schéma générique, utilisez l'[outil de validation du balisage Schema](#) afin de tester tous les types de balisage schema.org, sans validation spécifique à Google.

The screenshot shows the "Rich Results Test" interface. On the left, there is a "Code input" section containing the schema.org JSON-LD code for a recipe. On the right, under "Test results", it says "4 valid items detected". Below this, there are sections for "Guided recipes", "Recipes", "Review snippets", and "Videos", each showing one valid item detected. At the bottom, there are "VIEW TESTED PAGE" and "PREVIEW RESULTS" buttons.

Code input

```
1 <html>
2   <head>
3     <title>Party Coffee Cake</title>
4     <script type="application/ld+json">
5       {
6         "@context": "https://schema.org/",
7         "@type": "Recipe",
8         "name": "Party Coffee Cake",
9         "image": [
10           "https://example.com/photos/1x1/photo.jpg",
11           "https://example.com/photos/4x3/photo.jpg",
12           "https://example.com/photos/16x9/photo.jpg"
13         ],
14         "author": {
15           "@type": "Person",
16           "name": "Mary Stone"
17         },
18         "datePublished": "2018-03-10",
19         "description": "This coffee cake is awesome and perfect for parties.",
20         "prepTime": "PT20M",
21         "cookTime": "PT30M",
22         "totalTime": "PT50M",
23         "keywords": "cake for a party, coffee",
24         "recipeYield": "10",
25         "recipeCategory": "Dessert",
26         "recipeCuisine": "American",
27       }
28     </script>
29   </head>
30   <body>
```

Test results
